

SCOPE OF WORK (SOW)

Project: Sklovera - B2B Glassware Platform

1. Objective

Kevnit Digital Solutions will design and develop a **scalable B2B glassware sourcing platform** that enables:

- Seamless supplier product management
- Structured RFQ-based procurement for clients
- Automated pricing and quotation generation
- Optional eCommerce capability for retail buyers (Phase 2)

The system will ensure **supplier anonymity, pricing control, and operational efficiency.**

2. Scope of Services

2.1 UI/UX Design

- Wireframing for all user roles (Admin, Supplier, B2B Client, Retail Buyer)
 - Clean, minimal B2B interface design
 - Responsive design (mobile + web)
 - Dashboard UX for RFQs, products, and orders
-

2.2 Platform Development

A. Authentication & Role Management

- Secure login system (JWT/session-based)
- Role-based access control:
 - Admin
 - Supplier
 - B2B Client

- Retail Buyer
-

B. Supplier Portal

- Product upload interface (manual + CSV bulk upload)
 - Product editing & management
 - RFQ response interface (for custom products)
 - Restrictions:
 - No access to client data
 - No visibility into final pricing
-

C. Product Catalog System

- Search + advanced filters:
 - Category
 - Volume / Size
 - MOQ
 - Material
 - Anonymous listings (no supplier branding)
 - Optimized product cards
-

D. RFQ Management System

- RFQ cart system
 - RFQ submission workflow
 - RFQ dashboard for:
 - Clients (track status)
 - Admin (manage + process)
-

E. Pricing Engine (Core System)

- Custom pricing logic implementation:
 - Freight calculation (LCL / FCL)
 - Duty calculation
 - Margin configuration
 - Local logistics addition
 - Admin-configurable pricing rules
 - Multi-currency support (EUR → INR conversion)
-

F. Quotation System

- Automated quotation generation
 - PDF generation
 - Email delivery system
 - Dashboard storage for all quotes
-

G. Custom Product Module

- Client-side request submission:
 - Image upload
 - Specifications input
 - Admin assignment to suppliers
 - Supplier quotation submission
 - Admin approval workflow
-

H. B2B eCommerce Module (Phase 2)

- Inventory tracking system
- Fixed pricing model

- Cart & checkout flow
 - Payment gateway integration:
 - Razorpay
 - Stripe
-

3. Admin Panel Capabilities

- Product approval & editing
 - Pricing rule configuration
 - RFQ and order management
 - User management
 - Supplier assignment for custom requests
 - Manual override of pricing and quotations
-

4. Automation & Notifications

- Auto quotation generation
 - Email notifications:
 - RFQ submission
 - Quote delivery
 - Supplier alerts for custom RFQs
 - Low inventory alerts
 - Optional WhatsApp integration (Phase 2 / Add-on)
-

5. Technology Stack (Proposed)

- **Frontend:** React / Next.js
- **Backend:** Node.js (Express / NestJS)
- **Database:** PostgreSQL / MongoDB

- **Storage:** AWS S3 / Cloud Storage / Hostinger
 - **Hosting:** AWS / VPS / Hostinger (Kevnit managed)
 - **Integrations:** Razorpay, Stripe, Email APIs
-

6. Deliverables

- Fully functional web platform
 - Admin dashboard
 - Supplier portal
 - Client RFQ system
 - Pricing engine implementation
 - Documentation (basic system usage)
 - Deployment + live environment setup
-

Total Estimated Timeline: 35 to 45 days

Execution Notes-

- Phases will run partially in parallel (frontend + backend overlap)
 - Daily internal QA during development (not end-loaded testing)
 - Core focus is RFQ + Pricing Engine first, polish second
 - Phase 2 (eCommerce) is excluded from this timeline and treated separately
-

7. Assumptions

- All product data and pricing rules will be provided by the client
 - Third-party costs (hosting, APIs, payment gateways) are excluded
 - Content (images, descriptions) will be client-provided unless specified
-

8. Out of Scope (Can be added separately)

- ERP integration
 - Advanced AI recommendation engine
 - Mobile app development
 - Multi-language support
 - Advanced analytics dashboard
-

9. Post-Launch Support

- 30 days bug-fix support
 - Optional AMC (Annual Maintenance Contract) available
-

10. Commercials

(To be discussed separately based on final scope and integrations)

11. Acceptance Criteria

The project will be considered complete when:

- All modules listed are functional
 - RFQ → Pricing → Quotation flow works end-to-end
 - Role-based restrictions are enforced
 - System is deployed and accessible
-

10. Commercials

The total project cost is **₹20,000**.

The project will be executed in **3 structured phases**, with payments split equally across each phase:

Phase 1: Onboarding & Planning

- Requirement finalization
- System architecture planning
- Project kickoff

Payment: ₹6,667 (Due at project initiation/sign-up)

Phase 2: UI/UX Prototype

- Wireframes and UI design for all modules
- User flow validation
- Design approval

Payment: ₹6,667 (Due upon prototype completion & approval)

Phase 3: End-to-End System Development

- Full platform development
- Integration of all modules
- Testing and deployment

Payment: ₹6,667 (Due upon final delivery before handover)

Note:

- Work on each phase will commence only after the corresponding payment is completed.
